Pre-primary and classes I to V

The evaluation process has been designed by keeping a development profile for each child. The profile presents information on the children and their development in a continuous manner. It focuses not only on learning subjects but on the total personality development of the child. Information on the children is gathered by the teachers through observation in classrooms, activity rooms as well as outdoors, personal discussion, worksheets, oral work, clay, music, dance, physical training, etc. Routine kind of homework is deliberately avoided to reduce pressure on children and make schooling joyful. There is continuous observation of children in different aspects of development. The attempt is to translate the curriculum in a more personalized, joyful and fun manner, relevant to individual learning styles of children. This year we are starting Pre-primary school shortly primary and secondary classes will be started.

Little Bambino's Play School located in Vindhya Vihar Colony Padra, Rewa, India.
 The school was founded by Dr. B. Gopal.

Infrastructure - At present school have six big Class rooms, computer lab, library, auditorium and halls, the sports fields and courts and the managerial areas. The school has an auditorium hall for indoor events and activities, an assembly hall for functions, table tennis hall and badminton, basketball. The school provides coaches for aerobics and yoga.

Curriculum for Nursery and K.G

In school, the children will enjoy circle time or free conversation which involves various activities. To ensure all of the above, the Little Bambino's Play School curriculum has three specific elements i.e. 3 H's : Hand-Head-Heart

**Hand-Stimulation
Head-Thinking
Heart-Nurturing**

HAND - STIMULATION-

Ninety Eight percent of the brain develops in the first 6 years and thus young kids love to touch everything, in fact they use their 5 senses in learning. To help make brain connections, learning in Little Bambino's Play School is about the basic stimulation involved. Hence, all learning at Jumbo Kids is about sight, sound and touch or experience. So hands-on-stimulation, the first element is the KIDUCATION curriculum translates for teachers and parents into creating opportunities for kids to understand reason and implement.

HEAD - THINKING -

Why? Is the favorite word of young kids, this is because their neurons are connecting at a break neck speed & curiosity becomes the key to keep these neurons connected. So at Little Bambino's Play School we do not believe that 'curiosity killed the cat' in fact we believe that curiosity helps create brighter brains. So we allow kids to question and in fact motivate them to wonder. So while a rote based curriculum will teach kids that the sky is blue, Little Bambino's Play School helps them wonder and understand 'why' the sky is blue. For parents and teachers it translates into projects, events and activities, all designed to help kids wonder, question and seek their own answers.

WHY?

HEART - NURTURING -

The goal of all education is about using knowledge to make the world a better place. When the head thinks, the heart understands and implements. Little Bambino's Play School knows that it is EQ that will make kids successful individuals and so all learning culminates into doing, practicing and creating stress free environments for kids. Teachers and parents partner to understand that children have a strong desire to explore, question and manipulate and nurturing this desire sets the stage for future learning and leads to clarification and understanding-the foundation of lifelong learning. The Morning Assembly is an integral part of the day in which stories, songs, rhymes, puppet-shows and skits are included, where children and teachers are active participants. Every child is given the opportunity to take part in the 'Assembly' over a period of time to enhance and build up the child's confidence. A child's potential can be channelized through a component called "Learning By Doing". Various means are used, such as cutting, pasting, coloring, free hand drawing and a number of other activities. The free hand drawing is not just lines and symbols, but the child's expression of his thoughts which he/she may not be able to put into complicated words like we adults. These are simple stories told by the children. Children are not directed with the use of crayons. Every child's drawing is appreciated.

Music and Movements

Children enjoy rhymes and stories where they sing and dance along with the music played in class. They recite rhymes happily and listen to stories and in turn begin creating and narrating their own stories too. This component builds up listening skills, enhances rhythmic movement, language, physical development and also imaginative skills. Outdoors Children go for nature walks around the school, play on the swings, run races and so on. Observation, patience, language and listening skills are developed. Children love visiting the playroom where they are free to choose and play a variety of games, whether it is in the doll house or playing with kitchen sets, beads, blocks, puzzles or simply sit and browse through picture of story books. Skits are also organized in the playroom. Different situations, such as enacting a social gathering like a birthday celebration or playing 'GHAR GHAR' are encouraged.

Vision and Mission

Little Bambino's Play School has been established in 2015. It is a progressive, English medium, co-educational school, based on Indian thought, culture and tradition. The aim of the school is to impart integrated and comprehensive education, which is formative and not merely informative. It lays emphasis on holistic development of the student's character and personality which should normally lead him/her into self fulfillment and dedicated service to the society. It endeavors to guide and shape natural talent so that a student is able to:

- Develop a scientific outlook and an attitude for learning throughout life.
- Keep abreast of time without giving in to unreasoned temptation to change or forsaking the proven values of life

Safety, Health, and Security-

School, we understand education and development are important, but nothing matters more than the safety of your children. School safety is a top priority. Our teachers and staff take great care to ensure safety at preschool by creating a safe and healthy environment that allows children to learn without boundaries - creating a world of endless possibilities for themselves. We have the following measures in place to ensure the safety, health and security of your children

Health Check :

- Each morning when the child arrives at school the teacher ensure the child's hands are sanitized before going to class.
- The Teacher/staff continues to monitor the child for any symptoms of illness during the day and notifies parents when their child does not feel well to help prevent an illness from spreading.

Cleanliness:

- Our campus, toys and other materials are disinfected on a daily basis with safe, non-toxic cleaning products. These products are locked away safely out of the reach of children.
- We encourage children to wash their hands several times throughout the day. We make learning about health and hygiene fun through songs and rhymes.

Security

- All measures are taken to generate security at playschool.
- Our campuses are secured so that only authorized staff and families may enter.
- No child will be released to any unknown person without written authorization and proper identification.
- Access to all classrooms is monitored and controlled to ensure security at preschool.
- Our safe, secure perimeters ensure that children can enjoy outdoor play safely.
- We use safety gates and cap all electrical outlets at child's reach.
